

BOSS RT1 ROOFTOP TENT

As with all BA products, the Boss RT1 is proudly 100% Australian Made and developed with over 20 years of experience. We take pride in ensuring that our products are of the highest quality and design to guarantee we are nothing short of the best.

The Boss RT1 is CAD designed with CNC cut and folded components, the shell is then fully tig welded. We have insulated both the floor and the roof of the tent and every bit of aluminium is covered with marine carpet preventing the chance of condensation.

Internal dimensions are 2165L x 1315W x 1800H allowing most people to be able to stand fully upright inside. When closed, there is more than enough room to leave bedding and even bags of clothes.
