Extra Cab	2100L x 1900w
Single Cab	2500L x 1900w

FULL VS FLATBED

Full trays are delivered with Headboard and Tray Sides to enable the most versatile functionality, with or without Canopies or Toolboxes.

Flatbed Trays are delivered without a Headboard and Tray Sides. This reduces tray weight, cost and provides a perfect platform for Canopies or Toolboxes.

CLASSIC RAIL VS CLEANSIDE

M-Spec Trays are available in 2 styles which completely change the functionality. Standard is our Railside which has rope rails along the side of the tray. The rope rails provide superior tie-down capability and our distinctive Classic Tray aesthetic.

We also have an optional Cleanside design with flush mount tie points mounted in the deck. Cleanside allows for slightly larger under body boxes and higher mud guards.

300MM CHASSIS EXTENSION

The M-Spec range has been designed to suit LC79's with a 300mm chassis extension from JMACX Engineering.

Boss Aluminium is a registered installer of all JMACX Engineering kits enabling us to build your LC79 from start to finish at our Boss Facility.

READY FOR WORK & PLAY

M-Spec is a culmination of research and development, innovative engineering and Boss Aluminium's 20 years of experience in developing custom tray and canopy solutions.

Based off our custom solution platform, the M-Spec design releases the full potential of modular functionality, future proofing any investment into a Boss Aluminium product.
