UPDATED DESIGN FEATURES

INTEGRATED TIE RAIL

All Boss Aluminium Trays now share the same deck rather than the previous 'cleanside' and 'railside' versions. The design features a sleek, new look and incorporates a revised multi-purpose tie rail design for optimum functionality. Despite containing more features than ever before, Boss expects the introduction of the new tray to result in reduced lead times. This will be achieved through the multi-fit design coupled with improved manufacturing processes.

BOSS GRID SYSTEM

The new tray deck houses 71 M12 nutserts that allows users to have maximum flexibility over what is able to be mounted or tied off on their Boss Aluminium Tray. This overall futureproofs the tray for any use. Boss Aluminium is constantly designing new components to increase the flexibility of customers' setups into the future.

LOCK-OUT DRAWER RAILS

The new tray design includes updated rails used for our Under-Tray Drawers. These new rails incorporate a locking mechanism, now preventing the drawer from closing unintentionally. With an easy-to-use latch on the side of the drawer, the user can release the drawer to close it. The feedback from our customers gets taken on board and this is a prime example of a change made from customer experience.

100% POWDER COATED

Boss Aluminium has Invested in a state of Art Powder Coating system, including a complete Pre-treatment plant designed for Aluminium and exceeding Australia Standards. This system is Chromemate free which means it's not carcinogenic and is good for the environment, workers, and the end user. It offers superior adhesion and protects the Aluminium and your investment, keeping it looking good for years to come. The Trays are now entirely powder coated, including underneath and all bracketry.

PREMIUM FEATURES

The Boss Premium tray continues to be the company's flagship model, suited to a select range of vehicles. The updated design delivers a series of new features that define this product as the absolute pinnacle in the aluminium tray market.

Below are specific features that position the Premium Tray as the ultimate rear end for a 4x4 ute.

Multi-Function Sheet Metal
Headboard

Large Double-Tapered Rear
Under-Body Boxes

Rear Step Infill Panel

Carpeted Under-Body Boxes
and Under-Tray Drawer

Premium Tapered One-Piece
Mudguards

12V Water Pump Included with
70L Under-Tray Water Tank

WHAT'S NEW?

TRAY

- Introduction of tie down rail into the side of the tray whilst maintaining the original compact side height.
- The deck includes the Boss Grid-Lock system. A grid of 71xM12 tie down points (in a dual-cab). This offers the ability to anchor all types of cargo such as:
 - Canopies
 - Motorcycles
 - Water Tanks
 - Toolboxes
 - Machinery
 - Fridges
- Fully powder coated, including deck

HEADBOARD

- Stronger sheetmetal design. Headboard uprights are tied to the main tray rails and in total there are 26xM8 bolts holding the headboard, making it stronger than welding.
- Includes 4xM12 multi-purpose tie down points
- Better access to canopy electrical connections, making it easier to connect/disconnect canopy.
- Provisions for ladder pins to bolt into top of headboard

SURFACE PROTECTION

- Fully powder coated including the tray deck and all underside/hidden surfaces. This looks better and provides superior protection with increased longevity.
