WALLKIT

Boss Aluminium, a long established Australian designer and manufacturer of commercial vehicle and 4x4 accessories has released a wall kit for the Boss 270 Awning. The wall kit has been in development over the past 12 months. Countless hours in R&D have been spent on making sure these walls are suitable for multiple vehicle heights whilst offering the quality customers would expect when purchasing a Boss Aluminium product.

DESIGN FEATURES

EVEN AWNING SIDES

The Boss 270 Awning features completely even sides, allowing these new walls to be placed in any order based on where you have the awning set up. This means there is no set order where the solid walls or window walls are placed.

YKK ZIPPERS

The 270 Awning wall kit features YKK Zippers. YKK Zippers have been used to ensure longevity of the awning walls, whilst offering an easy-to-use size 10 zipper for smooth fitting of the walls to the awning skirts.

WAX CONVERTERS CANVAS

The wall kit features the same Australian made canvas used for both the Boss RT1 Roof Top Tent and the Boss 270 Awning. The Coolabah 304GSM Dynaproofed Canvas offers a 5-year warranty. Proudly made in-house at the Boss HQ.

WALL BAG

The awning walls come as a set of 2, 4, or can be purchased individually. When purchased in a set, you will receive an awning wall canvas storage bag. Also proudly made with the same canvas in-house at the Boss HQ. The bag features 50mm wide straps to easily fit in the palm of your hand when carrying the kit.

MULTI-HEIGHT COMPATIBLE

The Boss 270 Awning wall kit features the ability to be compatible with multiple vehicle heights, without having to adjust the walls to suit your specific vehicle. The angle designed ensures that there is maximum coverage, no matter the vehicle height.
