BA
270 AWNING

GEN2

Boss Aluminium, a long established Australian designer and manufacturer of commercial vehicle and 4x4 accessories has released a second generation of the Boss 270 Awning. Following the release of the 270 Awning Wall Kit, there have also been some design revisions made for the Boss 270 Awning. The changes made are going to benefit the customer greatly, making setup and packup easier. Additionally, allowing fitting of the new wall kit to be more user friendly.

NEW DESIGN FEATURES

NEW AWNING BAG

After bringing canvas manufacturing in house, we were able to completely redesign the bag the awning is closed in. The bag is made from a completely rip-resistant PVC, utilising YKK zippers, now zipping along the bottom to allow water to escape the bag with ease.

EXTENDED SKIRTING

The 270 Awning now features longer skirting in black canvas. This has allowed us to relocate the zip for the awning walls to be lower and more accessible, allowing for easier fitment of the optional walls.

WIDER STRAPS

The Boss 270 Awning now features 3, 50mm wide velcro straps, allowing for a tighter and more secure pack up of the awning within the bag. These wider straps feature a tough and durable design for improved longevity.

We are excited to announce these updates to the Boss 270 Awning. We believe these changes will further improve the experience our customers have with this product, offering an updated aesthetic with the added features to make fitting the optional walls with ease. The Boss 270 Awning GEN 2 is available now. Please visit our website for all pricing, details, and specifications.
