270 FORWARD FOLDING AWNING

A NEW SPIN ON THE BOSS 270 AWNING

NEW FORWARD FOLDING SETUP

OPTIONAL LIGHTING AVAILABLE

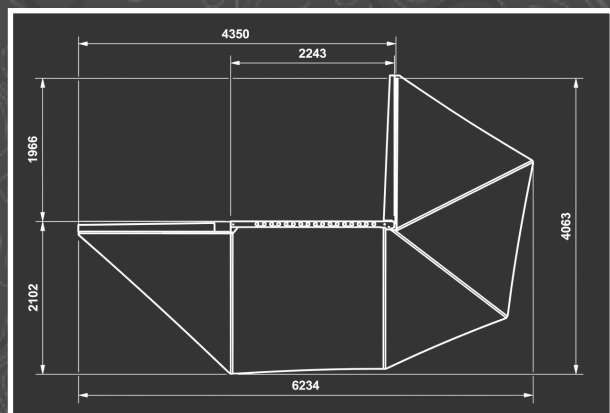

The Boss 270 Forward Folding Awning is an exciting variation of our 270 Awning, and has been built to withstand the rugged Australian environment and a lifetime of use, whilst remaining lightweight at just 29 kilograms.

Made from 100% Australian Made 260gsm Canvas and providing a huge 12.2m² of coverage, the Boss 270 Forward Folding Awning features a superbly engineered Tri-axis hinge utilising 12mm stainless steel bolts, coupled with aluminium chassis arms - negating the need for vertical support poles and making setting up a breeze, providing the ultimate protection from harsh outback conditions.

Its oversized storage bag is made from heavy duty 520gsm PVC, and allows for the Boss 270 Forward Folding Awning to be packed away with ease.

With the option to install additional lighting that is seamlessly intergrated into the Awning, and a lifetime warranty on workmanship to ensure your peace of mind, the Boss 270 Forward Folding Awning provides durability and convenience without ever compromising on quality.
